

AI Leadership in Action

Telekom Networks, Malawi

Prof. Abejide Ade-Ibijola

Professor of Artificial Intelligence and Applications
UCT GSB / GRIT Lab Africa

PROGRAMME ORIENTATION

Q & A?

Introduction — What to Expect?

Introduction

Who I Am

- Theory — practice — product — commercialization — societal impact

Introduction

Who I Am

- Theory — practice — product — commercialization — societal impact
- *Solver*: Industry, Government, Universities, Africa (Social Innovations)

Introduction

Who I Am

- Theory — practice — product — commercialization — societal impact
- *Solver*: Industry, Government, Universities, Africa (Social Innovations)

About GRIT Lab Africa

- Hands-on training in problem solving, algorithms, AI, and digital innovation

Introduction

Who I Am

- Theory — practice — product — commercialization — societal impact
- *Solver*: Industry, Government, Universities, Africa (Social Innovations)

About GRIT Lab Africa

- Hands-on training in problem solving, algorithms, AI, and digital innovation
- Innovators of the **VR Courtroom** and the **Learn and Earn App**.

Introduction — Recent Project 2025/2026

- Big Data Framework for ECOWAS (A World Bank Project), Togo.

Introduction — Recent Project 2025/2026

- Big Data Framework for ECOWAS (A World Bank Project), Togo.
- AI Applications to Customer Tweets — **Telkom SA**

Introduction — Recent Project 2025/2026

- Big Data Framework for ECOWAS (A World Bank Project), Togo.
- AI Applications to Customer Tweets — **Telkom SA**
- DeepSeek Integration in AI Applications — AI Dad at **Hauwei**.

Introduction — Recent Project 2025/2026

- Big Data Framework for ECOWAS (A World Bank Project), Togo.
- AI Applications to Customer Tweets — **Telkom SA**
- DeepSeek Integration in AI Applications — AI Dad at **Hauwei**.
- Speculating the future of banking (ABSA Africa, Standard Bank Group, Banking Association of South Africa).

Introduction — Recent Project 2025/2026

- Big Data Framework for ECOWAS (A World Bank Project), Togo.
- AI Applications to Customer Tweets — **Telkom SA**
- DeepSeek Integration in AI Applications — AI Dad at **Hauwei**.
- Speculating the future of banking (ABSA Africa, Standard Bank Group, Banking Association of South Africa).
- **Meta** — Llama Impact Accelerator SA (Judging Start-ups), Dubai (AI Summit), UAE (November, 2025).
- **SARS SA** — AI Strategy for Tax Administration (February 17–19, 2026).

Philosophy

- **Applied, design-led executive intervention** — not conventional training.

Philosophy

- **Applied, design-led executive intervention** — not conventional training.
- Participants act as **technical co-designers**, diagnosing TNM realities.

Philosophy

- **Applied, design-led executive intervention** — not conventional training.
- Participants act as **technical co-designers**, diagnosing TNM realities.
- Develop **AI-enabled solutions** to priority operational & strategic pain points.

Philosophy

Integrates structured components including:

- Demonstrations

Philosophy

Integrates structured components including:

- Demonstrations
- Critical reflection and critique

Philosophy

Integrates structured components including:

- Demonstrations
- Critical reflection and critique
- Co-creation workshops

Philosophy

Integrates structured components including:

- Demonstrations
- Critical reflection and critique
- Co-creation workshops
- Rapid prototyping

Philosophy

Integrates structured components including:

- Demonstrations
- Critical reflection and critique
- Co-creation workshops
- Rapid prototyping
- Executive pitching

Philosophy

Integrates structured components including:

- Demonstrations
- Critical reflection and critique
- Co-creation workshops
- Rapid prototyping
- Executive pitching
- Strategic foresight and future scenario analysis

Programme Outcomes (1/2)

- Validated **current-state view** of TNM technology and AI capability — with *simulations/games*.

Programme Outcomes (1/2)

- Validated **current-state view** of TNM technology and AI capability — with *simulations/games*.
- Prioritised **operational/strategic pain points**.

Programme Outcomes (1/2)

- Validated **current-state view** of TNM technology and AI capability — with *simulations/games*.
- Prioritised **operational/strategic pain points**.
- Co-created **AI-enabled solution concepts**.

Programme Outcomes (1/2)

- Validated **current-state view** of TNM technology and AI capability — with *simulations/games*.
- Prioritised **operational/strategic pain points**.
- Co-created **AI-enabled solution concepts**.
- 90-day Executive Action Plan.

Programme Outcomes (2/2)

- Developed a **future AI technology outlook** for TNM.

Programme Outcomes (2/2)

- Developed a **future AI technology outlook** for TNM.
- Strengthened understanding of **ethics, security, and responsible AI**.

Programme Outcomes (2/2)

- Developed a **future AI technology outlook** for TNM.
- Strengthened understanding of **ethics, security, and responsible AI**.
- Defined clear **pathways to pilot implementation and institutional learning**.

Day I: Shared Understanding, Games, and Painpoints

Day I: Shared Understanding, Games, and Painpoints (1/3)

Orientation & AI Foundations

- **Programme launch:** objectives, co-designer positioning, collaboration norms.

Day I: Shared Understanding, Games, and Painpoints (1/3)

Orientation & AI Foundations

- **Programme launch:** objectives, co-designer positioning, collaboration norms.
- Showcase of **TNM Training AI Tools** — *Bots, Games, and Simulations*.

Day I: Shared Understanding, Games, and Painpoints (1/3)

Orientation & AI Foundations

- **Programme launch:** objectives, co-designer positioning, collaboration norms.
- Showcase of **TNM Training AI Tools** — *Bots, Games, and Simulations*.
- **What AI is — and is not:** interactive session and game.

Day I: Shared Understanding, Games, and Painpoints (1/3)

Orientation & AI Foundations

- **Programme launch:** objectives, co-designer positioning, collaboration norms.
- Showcase of **TNM Training AI Tools — *Bots, Games, and Simulations***.
- **What AI is — and is not:** interactive session and game.
- **Solving TNM Painpoints** — a Simulation with AI Cards

Day I: Shared Understanding, Games, and Painpoints (1/3)

Orientation & AI Foundations

- **Programme launch:** objectives, co-designer positioning, collaboration norms.
- Showcase of **TNM Training AI Tools** — *Bots, Games, and Simulations*.
- **What AI is — and is not:** interactive session and game.
- **Solving TNM Painpoints** — a Simulation with AI Cards
- Demonstrations of applied AI: credit scoring, CIB apps, ECOWAS Big Data, Dad AI.

Day II: Co-Creation, Practical AI & Rapid Prototyping

Day II: Co-Creation, Practical AI & Rapid Prototyping

From Pain Points to AI-Enabled Solutions

- **Getting 'em hands dirty** — *Practical session, dashboards and chatbots*

Day II: Co-Creation, Practical AI & Rapid Prototyping

From Pain Points to AI-Enabled Solutions

- **Getting 'em hands dirty** — *Practical session, dashboards and chatbots*
- Overview of **AI-enabled tools** for TNM and applied use-cases.

Day II: Co-Creation, Practical AI & Rapid Prototyping

From Pain Points to AI-Enabled Solutions

- **Getting 'em hands dirty** — *Practical session, dashboards and chatbots*
- Overview of **AI-enabled tools** for TNM and applied use-cases.
- Recap of prioritised **operational pain points** and clarification of design-led criteria.

Day II: Co-Creation, Practical AI & Rapid Prototyping

From Pain Points to AI-Enabled Solutions

- **Getting 'em hands dirty** — *Practical session, dashboards and chatbots*
- Overview of **AI-enabled tools** for TNM and applied use-cases.
- Recap of prioritised **operational pain points** and clarification of design-led criteria.
- Co-creation studio mapping real-world challenges to **AI-driven solutions**.

Day II: Co-Creation, Practical AI & Rapid Prototyping

From Pain Points to AI-Enabled Solutions

- **Getting 'em hands dirty** — *Practical session, dashboards and chatbots*
- Overview of **AI-enabled tools** for TNM and applied use-cases.
- Recap of prioritised **operational pain points** and clarification of design-led criteria.
- Co-creation studio mapping real-world challenges to **AI-driven solutions**.
- Refinement, pitching and peer-reviewed evaluation of solution concepts.

Day III: Future Readiness, Research & Responsible AI

Day III: Institutionalising AI Capability

From Prototypes to Long-Term Capability

- Reflection on solution outputs and transition to **institution-wide AI capability**.

Day III: Institutionalising AI Capability

From Prototypes to Long-Term Capability

- Reflection on solution outputs and transition to **institution-wide AI capability**.
- Exploration of **next-generation technologies** shaping revenue administration.

Day III: Institutionalising AI Capability

From Prototypes to Long-Term Capability

- Reflection on solution outputs and transition to **institution-wide AI capability**.
- Exploration of **next-generation technologies** shaping revenue administration.
- Research-driven sandboxes, ecosystem-linked partnerships and skills-development pathways.

Day III: Institutionalising AI Capability

From Prototypes to Long-Term Capability

- Reflection on solution outputs and transition to **institution-wide AI capability**.
- Exploration of **next-generation technologies** shaping revenue administration.
- Research-driven sandboxes, ecosystem-linked partnerships and skills-development pathways.
- Responsible AI governance — ethics, risk-management and pilot-to-scale implementation.

Closing Report and Actionable Insights

Closing Report: Strategic Next Steps

From Engagement to Institutional Action

- Consolidated insights from **participant discussions** and co-creation sessions.

Closing Report: Strategic Next Steps

From Engagement to Institutional Action

- Consolidated insights from **participant discussions** and co-creation sessions.
- Identification of **high-impact AI-enabled opportunities**.

Closing Report: Strategic Next Steps

From Engagement to Institutional Action

- Consolidated insights from **participant discussions** and co-creation sessions.
- Identification of **high-impact AI-enabled opportunities**.
- Clear pilot-ready pathways with governance-linked ownership.

Closing Report: Strategic Next Steps

From Engagement to Institutional Action

- Consolidated insights from **participant discussions** and co-creation sessions.
- Identification of **high-impact AI-enabled opportunities**.
- Clear pilot-ready pathways with governance-linked ownership.
- Structured capability-building roadmap for responsible scale-up.
